

# Electricity cost pass-through trial 2021-22

## Bundaberg Distribution Scheme

### Background

Irrigation customers in the Bundaberg Distribution Scheme are participating in a three-year electricity cost pass-through trial, from 1 July 2020 to 30 June 2023.

During the trial, Sunwater's actual, scheme level electricity cost savings (if any) will be passed through to irrigation customers at the end of the financial year via a credit applied to their bills. If Sunwater spends more on electricity than we recover from customers, no debits will be applied to customers' bills.<sup>1</sup>

The trial covers irrigation customers on the 'Channel or watercourse supplemented by a channel' tariff group, as well as Burnett Water Pty Ltd irrigation customers who are supplied water via the Bundaberg Distribution Scheme.

### 2021-22 outcome (Year 2 of the 3-year trial)

In 2021-22, Sunwater spent less on electricity than we recovered from customers in the Bundaberg Distribution Scheme.

This means eligible irrigation customers who used water in 2021-22 will have a **credit** applied to their bill in October 2022.

The following section explains how the 2021-22 scheme level pass-through amount and individual customer credits are calculated.

### Calculation of the pass-through amount

The Queensland Competition Authority (QCA) included an allowance for electricity in its fixed and volumetric cost-reflective prices for the Bundaberg Distribution Scheme.

The scheme level pass-through amount is determined by deducting Sunwater's actual electricity costs in 2021-22 from the amount allowed by the QCA in its cost-reflective prices and subsequently recovered by Sunwater during the year. This amount is then divided by the scheme's water usage in 2021-22 to arrive at a dollar per megalitre (ML) pass-through rate.

The scheme level pass-through rate is based on cost-reflective pricing. In 2021-22 irrigation customer prices differed from cost-reflective levels. This affects (reduces) the electricity allowance recovered from irrigation customers via fixed and variable charges. This is reflected in the right-hand column of Table 1, which shows the electricity allowance recovered via actual irrigation prices. The right-hand column also shows how this has been used to calculate the irrigation customer pass-through rate.

---

<sup>1</sup> Sunwater may seek to recover our prudent and efficient electricity costs via an end of price period review if the QCA's cost-reflective allowance is less than actual costs. This will not occur as part of the trial.

The pass-through calculation for 2021-22 is detailed in Table 1.

Table 1: Calculation of the 2021-22 electricity cost pass-through amount<sup>1</sup>

Scheme-level information	Scheme	Customer
Water access entitlements (WAEs) – High priority	1,930 ML <sup>2</sup>	
Water access entitlements (WAEs) – Medium priority	163,827 ML <sup>2</sup>	
Usage – High priority	638 ML <sup>2</sup>	
Usage – Medium priority	54,198 ML <sup>2</sup>	
Actual electricity costs <sup>3</sup>	\$4,026,219	
<b>QCA electricity cost allowances</b>		
Electricity allowance in fixed cost-reflective price - High priority	\$15.75/ML	\$15.75/ML
Electricity allowance in fixed cost-reflective price - Medium priority	\$15.75/ML	\$8.71/ML
Electricity allowance in volumetric cost-reflective price - High priority	\$44.97/ML	\$44.97/ML
Electricity allowance in volumetric cost-reflective price - Medium priority	\$44.97/ML	\$37.39/ML
<b>Pass-through calculations</b>		
Electricity costs recovered via the fixed cost-reflective prices	$(\$15.75 \times 1,930 \text{ ML}) + (\$15.75 \times 163,827 \text{ ML}) = \$2,611,148$	$(\$15.75 \times 1,930 \text{ ML}) + (\$8.71 \times 163,827 \text{ ML}) = \$1,457,859$
Electricity costs recovered via the volumetric cost-reflective prices	$(\$44.97 \times 638 \text{ ML}) + (\$44.97 \times 54,198 \text{ ML}) = \$2,466,177$	$(\$44.97 \times 638 \text{ ML}) + (\$37.39 \times 54,198 \text{ ML}) = \$2,055,237$
Total electricity costs recovered via cost-reflective prices	$(\$2,611,148 + \$2,466,177) = \$5,077,324$	$(\$1,457,859 + \$2,055,237) = \$3,513,096$
Proportion of electricity costs recovered from scheme / irrigation customers	$(\$5,077,324 / \$5,077,324) = 100\%$	$(\$3,513,096 / \$5,077,324) = 69.19\%$
Total pass-through amount = recovered amount minus actual electricity costs	$(\$5,077,324 - \$4,026,219) \times 100\% = \$1,051,105$	$(\$5,077,324 - \$4,026,219) \times 69.19\% = \$727,279$
Total pass-through rate per ML = total pass-through amount divided by water usage (ML)	$(\$1,051,105 / 54,837 \text{ ML}) = \$19.17/\text{ML}$	$(\$727,279 / 54,837 \text{ ML}) = \$13.26/\text{ML}$

- Figures may not sum due to different rounding conventions between this table and the underlying electricity cost pass-through modelling.
- Includes WAEs and usage associated with Burnett Water Pty Ltd customers that are supplied their water via the channel system, as the QCA has allocated a share of the Bundaberg Distribution Scheme's costs to these customers.
- Excludes 5 per cent of electricity costs related to the Monduran pump station which are transferred to the Bundaberg Bulk Water Supply Scheme.

## Individual irrigation customer credits

The credit is calculated by multiplying the irrigation customer pass-through rate of \$13.26 ML by the irrigation customer's 2021-22 water usage at a water account level. Only water usage associated with eligible irrigation tariff groups is included in the calculation.

The credit will be visible on customers' October bills in the 'Other Fees and Charges' section. The accompanying description will include the following key inputs used to calculate the credit amount:

- the irrigation customer's aggregate annual water usage
- the pass-through rate of \$13.26/ML.

An example of how the credit will be displayed on an irrigation customer's bill is shown in Figure 1.

Figure 1: Example of how the credit will be displayed on a bill<sup>1</sup>

### This invoice in detail

#### Other Fees and Charges

Date	Transaction	Description	Amount(\$)
28 Jul 2021	Irrigation Electricity Passthrough	644.32 ML @ \$6.49 per ML pa in arrears	4,181.64 CR
<b>Total Other Fees and Charges</b>			<b>4,181.64 CR</b>

- The pass-through rate of \$6.49/ML is used for illustrative purposes. As noted above, the Bundaberg Distribution Scheme's pass-through rate for 2021-22 is \$13.26/ML.*

### How can I find out more?

More information is available in the frequently asked questions document available on the Sunwater [website](#).

If you have a query in relation to the calculation of the scheme level pass-through amount, or the credit applied to your October bill, please contact customer support via email [customersupport@sunwater.com.au](mailto:customersupport@sunwater.com.au) or phone on 13 15 89.
