

### Beardmore Dam Forecast Storage Volumes 1 July 2018

As at 14 June 2018:	
Scenario	Forecast Storage Volume on 1 July 2018
Based on average monthly inflows	81,700ML or 100%
Based on minimum monthly inflows	55,559ML or 68%

BOM observations from the past 20 years indicate that this is the driest spell in the past two decades with the last recorded rainfall on March 8.

Beardmore Dam is at 71.7% (as at 6am 14-6-18) which equates to 58,579 ML. This is a similar position to 2016, however the dam filled in September 2016, so let's hope for a repeat.

### Bulk Share Announced Allocation

For the current Water Year the Announced Allocation % is, MP 87% effective 1.04.2018.

From 1 July 2018 SunWater will calculate the start of water year Announced Allocations for 2018-2019 and will notify customers by email and/or SMS and will be made available on the SunWater website. Please call us on 13 15 89 if you need to update your contact details.

### **End of Water Year Temporary Transfer Applications**

Please ensure applications are submitted at least two (2) working days prior to the 30 June. SunWater will send approval/refusal notifications to the buyer and seller. For a smooth process please ensure that all accounts are paid in full and that the application has been signed by all relevant parties.

### **End of Water Year Meter Readings**

SunWater will be completing your meter readings for 2017-2018 water year towards the end of June. However, if you wish to record water used up to and including the 30 June as being used in the 2017-2018 water year, you must advise SunWater of this reading **no later than Close of Business on Monday 2 July**. You can do this by, entering your reads on SunWaterOnline, email photos of your meter dial/s and ensuring you include your offtake number/s or email, fax or phone reads to SunWater Customer Support. See contact details in the footer of this document.

*Please Note: Any readings received after this time will not be considered in the 2017-2018 water year.*

### **Carryover of unused CAP from 17-18 water year to 18-19 water year**

Carryover of Unused CAP will be made available for the 2018-2019 water year subject to the rules in the Condamine and Balonne Resource Operations Plan. More information regarding the rules for Carryover can be found in section 199 of the ROP. <https://bit.ly/2M7xed8>

### **Individual Continuous Shares 1 July 2018**

If your water allocation is managed under the Individual Continuous Share methodology you will be able to access your account balances through SunWater Online after the meter reads have been completed in June. CAP balances will reset effective 1 July for the 2018-2019 Water Year and applicable carryover will be applied once the end of water year processes have been finalised.
