

BUNDABERG WATER SUPPLY SCHEME

Water Supply Arrangements

This is referred to as SunWater Distribution Rules in the Channel/Pipeline contract; and SunWater Rules in the River/Groundwater contract.

To manage the water delivery to our customers, arrangements for the taking of water in the Scheme are routinely discussed with the Irrigator Advisory Committee. These arrangements are aimed at achieving the efficient delivery of water to customers in the Scheme that best meets their needs.

Channel Supplies

Taking Water from the Scheme

The Bundaberg Water Supply Scheme (Channel) operates as an on-demand water supply with no water ordering system in place. Distribution of water during times of peak demand, roster periods or restrictions may be required in accordance with the Access Conditions.

Access Conditions (Working Supply Rates/ Roster)

This is referred to as Access Conditions in the Channel/Pipeline contract

The channel system's capacity is generally based upon the principle of supplying 100mm of irrigation water on-farm to 80% of the 1970 Total Gross Assigned area in 15 days. A 5 days on out of a 15 day roster system was assumed during design and implemented in the irrigation scheme's early days. However, irrigation equipment and practices used throughout the scheme have changed and now there is generally a requirement that the 5-day volume be taken at lesser rates over longer periods.

Currently irrigators are restricted to 1% of their water allocation per day during time of peak demand. SunWater will be working with the Irrigator Advisory Committee in moving towards expressing actual flow rates at individual meter outlets, based on original design criteria.

Supply Rate Control

On-farm flow rate must not be regulated through the use of the SunWater's gate-valve installed upstream of the meter. For on-farm flow regulation customers must install an approved valve downstream of the meter outlet.

Customers must ensure that the flow rate at which water is taken, remains within the meter's operating range. Taking water at flow rates above or below the meter's operating range is not permitted. If a meter installation is no longer suitable for your irrigation practices, please discuss replacing the installation with the Customer Support 13 15 89.

Additional Water made available by SunWater

SunWater may offer additional water to customers from time to time (eg. prior to drawing down channels before shutdown). Such water is additional to the customer's announced allocation (maximum distribution volume).

SunWater will notify customers via SMS and/or email when additional water is available, indicating:

- the time from which additional water is available;
- when additional water will cease to be available;
- where additional water is available from; and
- the price for the additional water taken.

Unless otherwise notified customers wishing to take additional water must:

- provide their meter readings to SunWater by telephone, email or facsimile before taking the additional water; and
- provide the end meter reading when the additional water is no longer required; or when SunWater announces that the additional water is no longer available.

Please note that customers have the choice not to take this additional water. If customers do not want to take the additional water, no action is required.

River Supplies

Taking Water from the Scheme

The Bundaberg Water Supply Scheme (River) operates as an on-demand water supply with no water ordering system in place.

Access to Storage

Storages are currently operated in the following nominal operating range.

Bucca Weir	4 metres below Full Supply Level (FSL)
Ben Anderson Barrage	3 metres below FSL
Kolan Barrage	0.75 metres below FSL
Ned Churchward Weir	8.5 metres below FSL

It may be necessary in times of limited supply to operate at levels lower than those quoted above.

This range may change in the future if required; for example, under SunWater's Resource Operations Licence (ROL) and for other licence changes. Customers will be informed if such a change occurs.

Customers should note that they are responsible for locating and maintaining pumps to take water.

Waterharvesting

Waterharvesting is announced and charged for by the Department of Natural Resources and Mines. Any enquiries with regard waterharvesting should be directed to your local office of the Department of Natural Resources and Mines. The Department of Natural Resources and Mines will inform SunWater of readings so that SunWater can record this use as waterharvesting.

If no meter readings are received from the Department of Natural Resources and Mines then all water taken will be treated as Announced Allocation.

Channel & River Supplies

Changes to the volume or location for taking water

Customers wishing to:

- nominate a different location for taking water in the channel system (including a temporary transfer or combining two or more delivery points); or
- have multiple delivery points; or
- transfer water to another customer

must first obtain SunWater's approval. For their own benefit, customers should obtain SunWater's approval before finalising any dealings with another party (eg. a temporary transfer).

SunWater may require operational and other issues to be resolved before granting its approval. These will be discussed with customers during the application and approval process.

Applications forms are available from the SunWater Customer Support on 131589 and www.sunwater.com.au.

Stopping or restricting supply

SunWater may suspend or restrict supply in a number of circumstances, including:

- during maintenance of SunWater's assets;
- if supply could cause SunWater to break the law;
- during a peak demand period, when rosters or rations may apply;
- when the demand for water is so small it is impractical to supply it;
- infrastructure limitations which make delivery impractical;
- when there is a need to make special releases to maximise efficiency at times of limited supply; or
- during rain shutdown.

In the event of the above customers will be contacted by SMS and/or email.

In the event that SunWater restricts or suspends supplies customers should make arrangements for on-farm water storage to provide their on going water requirements during interruptions.

Rain Shutdown

To conserve water, the duty Operations Officer may shutdown the system when there is widespread general rain.

General

Complaints and Dispute Resolution

SunWater's aim is to resolve problems and complaints quickly and effectively. Where a customer has a concern that is not able to be resolved, customers can choose to initiate a formal dispute resolution process by writing to the Customer Accounts Manager.

If through discussions, resolution cannot be reached either party may request the commencement of negotiations in good faith on a dispute resolution procedure, other than litigation or arbitration. If agreement is reached to proceed to the next phase, independent mediation services of the Disputes Resolution Centres of Queensland can be used.

Billing Arrangements

Invoices are sent quarterly and all invoices must be paid within 30 days. Payments are allocated to the customer's oldest debt first, unless an invoice is in dispute. SunWater only posts Summary Invoices to customers, however, you can receive a Detailed Invoice via email. Contact 13 15 89 to arrange to take advantage of this option.

Notices

Correspondence should be sent to the SunWater Customer Support as detailed below.

SunWater Limited
PO Box 15536
CITY EAST QLD 4002
Facsimile: 3120 0249
Email: customersupport@sunwater.com.au

Communication – Contact Arrangements

SunWater Customer Support has staff available for enquiries and business transactions (billing, temporary transfers, etc.) between the hours of 8.30am and 4.30pm. Monday to Friday – Phone: 131589.

SunWaterOnline is available to all Account Holders and gives customers the access to enter meter reads, view and print Invoices, update account details, enter water orders, submit temporary transfer and carryover applications. Call 13 15 89 to set up access or for help in using our online portal.

It is of great assistance if customers can provide an offtake number when reporting supply problems. Offtake numbers are recorded on quarterly water statements and on metal tags physically attached to meter installations.

In the event of an emergency, please call 13 15 89 and press 1 (24 hours a day, 7 days a week).

Further information about SunWater can be obtained from our website: www.sunwater.com.au

SERVICE TARGETS

As described under clause 3 of the standard contract

We are committed to publishing service targets and reporting to customers on our performance against the targets. This document contains service targets that have been set for the Bundaberg Water Supply Scheme (Channel & River).

Planned Shutdowns

Planned shutdowns have been included as a target and SunWater recognises that the following are important service issues for you:

- *That you will be notified about a shutdown so that you can plan ahead;*
- *The timing of the shutdown should suit most customers;*
- *The duration of the shutdown should minimise the impact on customers, while enabling SunWater to perform maintenance on the scheme.*

Definition: A Planned Shutdown occurs when a customer's supply is interrupted or restricted due to the performance of work that is planned in advance.

Planned Shutdowns – Timing

Delivery Service Type	Scheme Target
River & Channel	The timing of all planned shutdowns will be set following consultation with the Irrigator Advisory Committee (for a shutdown affecting a large part of the scheme) or customer groups or individuals (for shutdowns effecting small areas).

Planned Shutdowns – Duration

Delivery Service Type	Scheme Target
River & Channel	SunWater will complete all planned shutdowns within the period notified to customers (unless later varied by agreement with the group originally consulted with), unless something occurs that is beyond SunWater's control, such as adverse weather conditions.

Planned Shutdowns - Notice

Delivery Service Type	Scheme Target
River & Channel	<p>For shutdowns planned to exceed 2 weeks, at least 8 weeks written notice by letter will be provided to each customer affected by the annual shutdown.</p> <p>For shutdowns planned to exceed 3 days, at least 2 weeks written notice by letter, fax, telephone, or verbal advice will be provided to each customer affected by the shutdown.</p> <p>For shutdowns planned to be less than 3 days, at least 5 days notice will be provided at least verbally to each customer affected.</p> <p>Each notice will state the start date, and anticipated shutdown duration.</p> <p>A reminder will be placed in the Bundaberg News Mail, the Isis Town & Country newspapers and on local ABC radio one week before the planned shutdowns commence.</p>

Unplanned Shutdown

Unplanned shutdowns have been included as a target and SunWater recognises that the information provided to you about an interruption and the period of time taken to resume supply are important to you.

Definition: *An Unplanned Shutdown is an unforeseen or not planned mechanical or operational failure of SunWater's water delivery infrastructure that stops or restricts the supply of water to a customer for more than 2 hours (including emergency repairs). It does not include events that are beyond SunWater's control (eg. power failure or storm)¹ and does not include interruptions to supply caused by errors in estimating water demand and releases, or people taking water without authorisation.*

Unplanned Shutdown – Duration

Delivery Service Type	Scheme Target
River & Channel	<p>Unplanned Shutdowns will be fixed so that at least partial supply can be resumed to those customers requiring water within:</p> <ul style="list-style-type: none"> 72 hours of SunWater being notified of the event. <p>Some events may interrupt supply greater than the above standard and are excluded from these targets. SunWater will publish in the Bundaberg News Mail, the Isis Town & Country newspapers, on local ABC radio and SMS messaging, these events from time to time.</p>

Unplanned Shutdown - Notice

Delivery Service Type	Scheme Target
River & Channel	<p>SunWater will notify all affected customers requiring water SMS messaging, verbally or by telephone, radio announcement, email or fax of the likely duration of the interruption to supply within 24 hours of learning of the event, or by the end of the first business day following the event, whichever is the earlier.</p>

Unplanned Shutdown – Meter Repairs

Delivery Service Type	Scheme Target
River & Channel	<p>Faults causing restrictions to supply will be repaired within one working day of SunWater being notified.</p>

Total frequency of interruption to supply

Frequency of interruptions to supply

Delivery Service Type	Scheme Target
River & Channel	<p>No customer will experience more than ten planned or unplanned interruptions per water year (as defined above).</p>

¹ This includes other events described as Events of Force Majeure in your contract.

Complaints & Enquiries

SunWater will provide an initial response to all complaints within five working days of receiving a complaint by the customer:

- in writing; or
- by telephoning Customer Support on 13 15 89

SunWater will either resolve a customer's complaint, or provide a written response providing reasons why the complaint has not or cannot be resolved within 21 days of receiving the complaint.

Customer Obligations

The Customer principal obligations are set out in clause 4 of the Standard Contract.

Warning to Customers

In particular Customers should note that a customer must not take more than the Customer's Maximum Delivery Volume as allowed by the Customer's Standard Contract without first obtaining SunWater's approval. If a Customer exceeds the Customer's Maximum Delivery Volume, the Customer may also be in contravention of the *Water Act 2000*. SunWater may direct the Customer not to take any water. Depending on the circumstances of the breach, the Customer is not automatically entitled to forward draw on the following year's water entitlements, if any, and is therefore not entitled to take water until SunWater is satisfied that the breach has been remedied.
