| Part G – Transfers out of Channel System – Termination Fees | |
| If the Seller has a channel contract and the Purchaser wants to take the water from the river then a Termination Fee may apply. Refer to the Fees and Charges Schedule for tariffs. | |

Part H – Transfer Statement

The Seller gives notice under Clause 15 of their contract to reduce their Allocation by the Nominal Volume, from the date of the registration of the transfer to their Allocation.

The Purchaser seeks to amend their contract(s) with SunWater under Clause 15 to increase their Allocation by the Nominal Volume. If the Purchaser does not hold a contract, the Purchaser will enter into a delivery contract with SunWater for the Nominal Volume.

The Purchaser and Seller agree to the terms outlined on this Application.

The Seller agrees that if they are selling all of the Water Allocation subject to a contract, then this is an application to terminate that Water Supply Contract.

The Purchaser further acknowledges that SunWater may need to apply conditions in relation to distribution losses associated with the delivery of additional water into the channel system.

Solicitor signing on behalf of Purchaser and/or Seller:

Where a solicitor acting for a Seller or Purchaser signs this application, the solicitor warrants that their client has read, understood and agreed to be bound by the Terms & Guidelines and Transfer Statement.

*Where the solicitor signs for a Seller or Purchaser the solicitor’s name and firm must be included with the signature.

Response time by SunWater

- Provide supply contracts for signing – 10 business days from receipt of all required documents & forms
- Issue of ROP13 – 2 business days from receipt of completed contracts

Application

This application must be signed by the Purchaser and Seller or their solicitor. Please attach all **REQUIRED DOCUMENTS** to enable SunWater to accept and proceed with this application.

Application Fees

Please refer to the Fees and Charges Schedule for the applicable Administration and Transfer Fees.

Amending the Purchaser's Contract

If the Purchaser does not have a current contract, SunWater will send a new contract to the Purchaser for them to sign.

If the Purchaser already holds a standard supply contract, SunWater may issue a new contract or a letter of amendment.

Amending the Seller's Contract

If the Seller is selling all of their Water Allocation subject to a contract, then SunWater will release the Seller from their Contracts after:

- Registration of the Water Allocation in the name of the Purchaser
- Payment of Termination Fees (if applicable)
- Payment of all charges under the Contract

If one of the Seller's Water Allocations are being transferred, SunWater will amend the Seller's contract to reflect the reduced Water Allocation upon the above conditions being met.

Water Charges

The Purchaser and Seller are advised to deal with apportionment of water charges as part of settlement.

If a final meter reading is obtained then SunWater may issue a final invoice addressed to the Seller. SunWater can provide a final meter reading for a fee or customers may choose to read the meter themselves and advise SunWater.

If the Purchaser is subject to the Rural Water Pricing Direction Notice (1) 2006 (Price Path), these charges will apply. Otherwise, charges must be negotiated with SunWater. Please contact SunWater on 13 15 89 to discuss if you are in any doubt.

Part F Transfer Volume of available water

Not applicable if the Seller's account will be closed after this application.

If the Seller's transfer volume of water is not the same as the announced allocation volume of the relevant Water Allocation please complete this section.

Drainage Charges (Burdekin Haughton, Dawson Valley, St George and Nogoia Mackenzie WSS)

Drainage charges are set per ha of land these charges continue to apply for landholders in the drainage area, despite the transfer of the Water Allocation.

Channel Deliveries

Flow Rates and Maximum Diversion Rates – Channel (if applicable)

Access conditions and maximum diversion rates and works approvals are not affected by these amendments.

Caps for Transfers into Channel System (if applicable)

Channel/Pipeline capacity limitations may exist in some schemes therefore no additional allocation can be transferred into these sections.

Provided there are no other operational constraints to the delivery of water, there are currently no caps apart from those set out in the relevant Resource Operation Plan.

Part G Transfers out of the Channel system (if applicable)

Where a requested transfer involves the movement of water between the channel/pipeline and the river, approval of the transfer is at the sole discretion of SunWater, taking into account relevant contractual obligations and relevant regulations.

A Termination Fee payable by the Seller to SunWater applies where water is being transferred out of the channel/pipeline system. Refer to the Fees and Charges Schedule for tariffs.

Distribution Losses in the Channel System

SunWater will consider the impacts on distribution losses from the transfer as part of this application and advise the Purchaser of any requirements.
