

Announced Allocation

Under the rules of the Interim Program (approved June 2017) the current announcement for Medium Priority is 10% for the month of July only.

Did you know – Farmers save through Energy Savers Audit?

Primary producers could potentially save tens of thousands of dollars by tapping into the savings realised through on-farm energy audits.

The Energy Savers program covers virtually every major agriculture sector that uses energy intensively in Queensland and the findings are now being shared with primary producers across the state at field days and on-line.

Case studies featuring many of the completed audits are available at <http://www.qff.org.au/projects/energy-savers/>. Check out the QFF website and your local associations for details of field days to be attended by the Energy Savers team.
