	SMS Message: <input type="checkbox"/> Mobile Phone # _____
Part C – Transfer Volume Details	
Seller's Nominated Transfer Volume _____	
Part D – Transfer Start and End Dates (minimum 1 month)	
Start Date _____	End Date _____
Part E – Transfer Statement	
<p>This application is made under the standard Water Supply Contract.            The Seller requests to reduce the PFE share available to them by the Nominated Transfer Volume and the Buyer requests to increase the PFE share available to them by the Nominated Transfer Volume. The Buyer and Seller acknowledge that they have read and agree to the Transfer Conditions on the back of this form and acknowledge that in addition to the Transfer Conditions this application will be assessed by SunWater in accordance with the system constraints for the water supply scheme in place on the day that SunWater receives this application.            This form must be signed by <b>ALL</b> those listed as Customers on the Water Supply Contract or listed as holders of the Water Allocation ("Relevant Signatories"). The Relevant Signatories may sign this form personally, or an authorised person may sign on their behalf. SunWater accepts the signatures of persons authorised to sign under a SunWater "Appointment of Agent Form", and persons authorised to sign under a relevant Power of Attorney, where a copy of that Power of Attorney is attached/already submitted. Authorised persons should specify on whose behalf they are signing, and whether they are signing under an Appointment of Agent Form or a Power of Attorney.</p>

### **1. What is a transfer of Peak Flow Entitlement?**

A peak flow entitlement (PFE) is the entitlement to a non-divisible share of the capacity of the channel system during peak demand periods based on the original design of the channel distribution system. Outlets constructed since the original scheme was built do not have a Peak Flow Entitlement.

The Seller's Peak Flow Entitlement share for the nominated period will be reduced by the nominated transfer volume. The Peak Flow Entitlement share available to the Buyer will be increased by this volume.

### **2. Peak Flow Entitlement (PFE) Share**

PFE share is the non-divisible share of the available flow capacity of the channel system able to be taken by customers who own a non-divisible peak flow entitlement share, during a peak flow period.

### **3. Application**

A Water Supply Contract holder may make an application to transfer a whole PFE share to another Water Supply Contract holder. The Application will be subject to system constraints and must be for a minimum period of 1 month.

To apply for a PFE share transfer, both the Buyer and Seller should complete and sign this Application Form and submit it either by Fax, Email or Mail as per the details above a minimum of ten working days prior to the commencement date that the PFE share is to be transferred. Late applications will not be considered within the ten day period.

SunWater will notify the Buyer and Seller by Email or SMS within 5 business days of receiving all applications (correctly completed) whether the PFE share transfer has been approved or refused.

You should check the SunWater website prior to signing the application form to ensure you have a current version of the application form. Your application will not be assessed by SunWater unless you have used the most up-to-date version of the application form.

### **4. Grouping**

A Water Supply Contract holder who has more than one Water Supply Contract that are in the same name may make an Application for the grouping of PFE shares.

This allows the taking of PFE share through any of the grouped outlets subject to system constraints.

An application to group PFE's must be made by 30 September each year.

Applications to group outlets can be made for a minimum of 1 year or until further advised.

Late applications will not be considered until the following year.

### **WARNING**

- Any transfer of money between the buyer and the seller is made at their own risk.
- The buyer should note that original PFE shares remain current until they receive the written confirmation from SunWater that the PFE share transfer has been approved.

### **5. System Constraints**

Applications will be accessed and approved subject to system constraints within the scheme.

In general applications for PFE share to be transferred on the same section of channel or transferred upstream will be approved however PFE share that is transferred to a downstream location will require assessment to determine the impact on other PFE holders.

Should the location of demand or system capacity change resulting in a restriction of supply in that section of channel where the peak flow has been transferred, the original peak flow farms in that section will be given priority to access their PFE share over that PFE share which has been transferred in.

### **6. Fees**

An application fee will be applied to the buyer's next quarterly invoice; this fee will cover the cost of administering the Peak Flow Entitlement trading and notification process.

Please see the Fees and Charges Schedule for the Nogo Mackenzie Scheme which can be found on the SunWater Website.

All outstanding monies on the Buyers and the Sellers Customer Accounts must be paid before this Application will be processed.
