Location: St George Office Meeting Room
Attendees: Scott Armstrong, Luke Stower
Apologies: Rob Jakins , Glen Rogan (has been briefed since), Hamish McIntyre, Bill Knights (has been briefed since)
Chair: Rohan Thorogood **Minutes:** Rohan Thorogood

Agenda Items		
Item No.	Agenda Item	Action Point
1.	Current staffing at StGeorge. Gordon Roberts is on personal leave with a back injury and expected back mid November. Justin Schultz has resigned effective December 22. The role of Senior Operator / Maintainer has been advertised.	No Action
2.	Buckinbah Bridge Project. Pile driving has been completed and headworks are about to commence. Project expected to be completed before the end of November.	No Action
3.	Moolabah Weir. RT explained that sand boil activity at Thuraggi Outlet had led to a workshop by Sunwater Engineers to complete a risk assessment. The outcome of the risk assessment was that there is a requirement to hold the water level in Thuraggi Channel to 202.0 when Beardmore Dam is at 75% FSL or greater. This produces hydraulic downward pressure and neutralizes the boil effect. In order to achieve this Sunwater is planning to raise the level of Moolibah Weir to its original level of 202.0. The project should be completed in November. Scott Armstrong raised concerns in regard to Moolabah leaking when held at this level.	RT to investigate concerns raised by Scott Armstrong and advise of the results.

Next Meeting:

Date: December 2017
Time: TBA
Location: St George Office – Meeting Room
