

8 June 2016

UPPER CONDAMINE WSS – END OF WATER YEAR 2015-2016 NEWSLETTER

CURRENT LEVEL OF LESLIE DAM

Leslie Dam is currently below 460.35m AHD and as per Section 165 of the Condamine Balonne Resource Operations Plan (ROP) water cannot be released from Leslie Dam for medium priority and high class B priority water allocations.

Should Leslie Dam receive significant inflow or conditions are met for a StreamFlow Event, medium priority customers may have access to 2015-2016 remaining nominal volume up to 30 June 2016.

2016-2017 WATER YEAR ANNOUNCED ALLOCATIONS

Unless Leslie Dam receives significant inflows and the storage level of Leslie Dam on 1 July 2016 is above the medium priority and high class B priority cut off level (460.35 mAHD) then Section 165 of the Condamine Balonne ROP will remain in place.

SunWater will calculate the actual initial Announced Allocations for 2016-2017 within the time frames specified in the Resource Operations Plan and publish the announcements accordingly. Customer notifications will be provided by email and/or SMS and will be made available on the SunWater website. Please call 13 15 89 if you need to update your contact details.

There are a number of tools available on the SunWater website to help you plan and manage your water use. These tools can be used throughout the year and can be particularly useful when dam volumes are low.

Storage Forecast

The Storage Forecast tool provides a 12 month outlook for water volumes for the major SunWater dams. The tool plots potential 12 month dam volumes for two different dam inflow scenarios.

The first plot is a water storage outlook based on average monthly inflows and the second plots a much drier scenario which shows dam volumes based on minimum monthly inflows.

Please be aware that the storage forecast graphs are intended as a guide only, and are subject to many assumptions

The Storage Forecast tool is available on our website http://www.sunwater.com.au/_data/storageforecast/Forecast_Portal.htm

Start of the Water Year Announced Allocation Prediction Graph

The Start of the Water Year Announced Allocation Graphs allows you to estimate what your announced allocation may be at the start of the water year. You can use the volumes from the Storage Forecast Tool (above) to estimate the volume held in the storage. Many variables can affect these predictions and they should only be used as an indicator.

The Start of the Water Year Announced Allocation Prediction Graph is available on our website <http://www.sunwater.com.au/schemes/upper-condamine/scheme-information/announced-allocations>

If you have any questions or require assistance using these tools please call SunWater Customer Support on 13 15 89.

CLEAR ACCESS TO METERS

The meters and fittings must be kept free of obstruction (including long grass) to allow easy clear access for reading and maintenance purposes. Please do not bury your meter, store empty chemical containers near it, build a fence or wall close to it or enclose it in a shed. Water meters can be relocated, if necessary, upon application and approval by SunWater.

If you have locks placed on gates or meter boxes, please ensure that SunWater Water Officers have access to the property, paddock or meter box.

END OF WATER YEAR METER READINGS

The final round of meter readings for the 2015-2016 Water Year will commence in June 2016. SunWater will be reading your meter during June 2016 but if you wish to record water used up to and including 30 June 2016 as being used in the 2015-2016 water year, you can do this by providing the details of the reading to SunWater **no later than 12 Noon on Friday 1 July 2016** via the methods listed below.

Please Note: Any readings received after this time will not be considered in the 2015-2016 water year.

Although SunWater will read your meter/s during June 2016 if you do wish to provide a final meter reading, please provide the details for each offtake as set out below to SunWater by SunWaterOnline, email, fax or telephone. (Refer to SunWater contact details included in this newsletter for further details).

Customer Number	Offtake Number	Meter Reading (All digits/dials)	Date Read

END OF WATER YEAR CALL LOAD

The end of Water Year period (June to July) is the peak period of the year for calls to our 13 15 89 number. There is a significant increase in calls relating in particular to Carryover, Temporary Transfers, and enquiries about remaining balances. By way of example, in June 2015 we received almost 33% more calls than May 2015. Our phones are manned Mon-Fri 8:30am to 4:30pm, but the sheer volume of calls we receive means that some go to voice mail. Our aim is to return all calls within the same day, but we do request your patience as we work through this busy period, and thank you for your understanding.

UNAUTHORISED USE

SunWater would like to remind customers that they have an obligation to comply with the Water Act 2000, the relevant Resource Operations Plan (ROP) for their Water Supply Scheme, their Water Supply Contract with SunWater and the Scheme Rules and Targets.

Under section 4 of the Schedule 3 of the Water Supply Contract, the customer is only permitted to take water under the Customer's ROL contract through the SunWater Diversion Works and the Customers Offtake Works. Any other water use is considered unauthorised water use.

Customers should note there are penalties for contravening conditions of water entitlement, seasonal water assignment notice or water permit under the Water Act 2000.

Please find more information in relation to action taken by SunWater and the penalties under the Water Act 2000 when unauthorised use is detected on our website under "Scheme Information".

END OF YEAR TEMPORARY TRANSFER APPLICATIONS

Please ensure the application form is submitted at least five (5) working days prior to 30 June 2016. SunWater will send approval/refusal notification to the buyer and seller. For a smooth process ensure that all accounts are paid in full and that the application has been signed by all relevant parties.

UNPLANNED SHUTDOWN NOTIFICATIONS

SunWater can provide you information on unplanned shutdown events that will affect you as soon as the information comes to hand through SMS messaging. We have received positive feedback from Customers who are already taking advantage of this service.

If you are not receiving SMS notifications of unplanned shutdown events, then you need to contact Customer Support to enable this functionality.

SunWater also has the ability now to add additional contacts (eg Farm Manager, Lessee etc) to your water accounts for event notifications only. If you wish additional contacts to receive SMS messaging notifications for unplanned shutdown events please contact Customer Support.

SUNWATERONLINE CUSTOMER PORTAL

Getting access to the customer online portal has never been easier, if you would like to access to your customer account online then please call Customer Support who will be available to help.

SUNWATER MOVING TOWARDS PAPERLESS

SunWater only sends summary invoices, instead of detailed invoices every quarter. However, if you would still like to receive a detailed invoice, please contact us on 13 15 89 or email customersupport@sunwater.com.au and we will arrange for a detailed invoice to be sent to you via email every quarter.

NEED TO UPDATE YOUR PERSONAL ACCOUNT DETAILS

As an important customer, we want to ensure your details are always up-to-date so we can send you the latest SunWater news and scheme information. This is more important now with the use of SMS messaging and emails, as such please ensure we have your current mobile phone number and/or email address. To update your information, simply log into SunWaterOnline, contact us on 13 15 89 or email customersupport@sunwater.com.au
