8 December 2016

Dear Customer

Proposed release to commence from Leslie Dam Monday 12 December 2016

SunWater have received interest from a number of customers who are looking to access their medium priority announced allocation water from Leslie Dam early next week.

Based on the feedback that we are hearing from our customers (both river and North Branch customers), and in the interest of making water delivery efficient, SunWater propose that we undertake two releases this water year; one beginning 12 December and another in early February next year. This approach has been discussed and is supported by the Chair of the Irrigator Advisor Committee (IAC).

To allow for the best position regarding the supply of all of the announced allocations before the medium priority cut off level in the storage is reached (EL 460.35 m AHD) the proposal is to release at least half of your announced allocation now, with the remainder to be released next year in early February. With this approach SunWater estimate (assuming no inflows) that there may be approximately enough water to supply all of your announced allocation (now at 53% MP AA) before the medium priority cut off level is reached, but this cannot be guaranteed.

You are now invited to consider your requirements and options on when it is best for you to take your announced allocation. You have a choice to take at least half your announced allocation now with the release scheduled for 12 December and the other half in early February 2017.

To place your water orders, please contact Darrell McKinlay on 0427 683 322 by 11.00am on Monday 12 December 2016.

Yours sincerely
