Volume 2

9.	Water quality	1
9.1	Description of environmental values	1
9.1.1	ANZECC'S primary industries (agricultural) water quality guidelines	2
9.1.2	Water quality monitoring programs	3
9.1.2.1	DNRW surface (historical) water monitoring	3
9.1.3	Pesticides monitoring	4
9.1.4	Water quality performance against the agricultural water quality guidelines	6
9.2	Potential impacts and mitigation measures	16
9.2.1	Construction phase	16
9.2.2	Operational phase	17
9.2.2.1	Interception of other water	17
9.2.2.2	Overflow arrangements	17
9.2.2.3	Weed Control	18
9.2.3	Benefited areas	18
10.	Coastal environment	22
10.1	Introduction	22
10.2	Description of environmental values	22
10.2.1	Commonwealth values	22
10.2.2	State prescribed values	25
10.2.2.1	Coastal and estuarine waters	28
10.2.2.2	Coral reef systems	36
10.2.2.3	Soft-bottom (benthic) systems	36
10.2.2.4	Mainland	38
10.2.2.5	Freshwater inflows	38
10.2.2.6	Coastal wetlands	39
10.2.2.7	Development assessable under the <i>Coastal Protection and Management Act 1995</i>	39
10.3	Potential impacts and mitigation measures	41
10.3.1	Potential impacts via land, soil and habitat disturbance	41
10.3.1.1	Direct impacts	41
10.3.1.2	Indirect impacts	42
10.3.2	Potential impacts via catchment runoff and water pollution	43
10.3.3	Potential impacts via weed and pest invasion	45
10.3.4	State Coastal Management Plan Policies	45
10.3.5	Summary; impacts on coastal environments	46

11. Air environment	52
11.1 Description of environmental values	52
11.1.1 Regional sources	52
11.1.2 Local sources	52
11.1.3 Adopted background air quality data	53
11.1.4 Sensitive receptors in proximity to Project	53
11.1.5 Air quality compliance criteria	55
11.2 Potential impacts and mitigation measures	55
11.2.1 Construction phase	55
11.2.1.1 Mobile vehicular emissions	55
11.2.1.2 Particulate matter methodology	55
11.2.1.3 Modelling characteristics	56
11.2.1.4 Air emission sources	56
11.2.1.5 Impacts on sensitive receptors	56
11.2.1.6 Mitigation measures	57
11.2.2 Operation phase	59
11.3 Greenhouse gas emissions	59
11.3.1 Legislative framework	59
11.3.1.1 International climate change policy	59
11.3.1.2 Australian climate change policy	59
11.3.1.3 State climate change policy and initiatives	60
11.3.2 Scope and methodology of GHG assessment	60
11.3.2.1 Scope for reporting the Project's GHG emissions	60
11.3.2.2 Methodology for reporting the Project's GHG emissions	62
11.3.2.3 Carbon sequestration potential calculations	63
11.3.2.4 Limitations of GHG assessment	64
11.3.2.5 Potential GHG Emissions	64
11.4 Greenhouse gas abatement	69
12. Waste	70
12.1 Waste management regulatory requirements	70
12.2 Waste management hierarchy	70
12.3 Waste inventory, characterisation and management	71
12.3.1 Waste-generating activities	71
12.3.2 Waste streams	71
12.3.3 Construction waste	72
12.3.4 Construction phase decommissioning waste	75
12.3.5 Operation waste	75
12.3.6 Waste management plan	75
12.3.6.1 Spill containment and remediation	75
12.3.6.2 Hydrocarbons and other hazardous waste	76
12.3.6.3 Cleaner production	76
12.3.6.4 Waste minimisation	76
12.3.6.5 Waste tracking	76
12.4 Potential impact on environmental values	77

13. Noise and vibration	78
13.1 Description of environmental values	78
13.1.1 Regional sources	78
13.1.2 Ambient noise level measurements	78
13.1.3 Sensitive receptors	81
13.1.4 Noise compliance criteria	81
13.1.4.1 Construction	81
13.1.4.2 Operation	81
13.1.5 Vibration compliance criteria	82
13.1.6 Airblast overpressure and blast vibration criteria	83
13.2 Potential impacts and mitigation measures	84
13.2.1 Noise during construction phase	84
13.2.1.1 Modelling methodology	84
13.2.1.2 Noise emissions sources	85
13.2.1.3 Impacts on sensitive receptors	85
13.2.1.4 Impacts on fauna	85
13.2.1.5 Mitigation measures	86
13.2.2 Noise during operation phase	86
13.2.2.1 Noise sources and emission levels	86
13.2.2.2 Potential impacts	86
13.2.2.3 Mitigation measures	87
13.2.3 Vibration during construction phase	87
13.2.3.1 Potential impacts	87
13.2.3.2 Mitigation measures	87
13.2.4 Blasting during construction phase	87
13.2.4.1 Mitigation options	88
14. Transport and access arrangements	89
14.1 Transport and access arrangements	89
14.1.1 Transport methods and routes	89
14.1.1.1 Existing rail network	89
14.1.1.2 Existing road network	89
14.1.1.3 Bus routes within the study area	96
14.1.1.4 Transport infrastructure changes associated with the Project	99
14.1.2 Potential impacts and mitigation measures	99
14.1.2.1 Delivery of construction materials	99
14.1.2.2 Traffic generation by construction activities	107
14.1.2.3 Construction activity traffic generation	110
14.1.2.4 Construction traffic impact assessment and mitigation measures	112
14.1.2.5 Traffic management — construction phase	118
14.1.2.6 Operational traffic impact assessment	120
15. Cultural heritage	121
15.1 Description of environmental values	121
15.1.1 Indigenous cultural heritage	121
15.1.1.1 Indigenous cultural heritage values	122
15.1.2 Non-Indigenous cultural heritage	123
15.1.2.1 Legislation	123
15.1.2.2 Methodology	124

15.1.2.3	Historical resources of the Project area	125
15.1.2.4	Non-Indigenous cultural heritage values	125
15.2	Potential impacts and mitigation measures	126
15.2.1	Indigenous cultural heritage	126
15.2.2	Non-Indigenous cultural heritage	127
16.	Social and economic environment	128
16.1	Social and economic environment	128
16.1.1	Description of environmental values	130
16.1.1.1	Community structure and profile	130
16.1.1.2	Demography	130
16.1.1.3	Housing and accommodation	132
16.1.1.4	Health facilities	133
16.1.1.5	Education facilities	133
16.1.1.6	Other community infrastructure and services	134
16.1.1.7	Local economy	134
16.1.1.8	Employment, labour and income	136
16.1.1.9	Workforce characteristics	137
16.1.2	Potential impacts and mitigation measures	139
16.1.2.1	Direct beneficiaries of the water allocation	139
16.1.2.2	Land acquisition and relocation issues	140
16.1.2.3	Land access and severance	141
16.1.2.4	Public health and safety impacts	141
16.1.2.5	Workforce accommodation	142
16.1.2.6	Community services	143
16.1.2.7	Community relations	144
16.1.2.8	Opportunities for economic growth, employment and local business	145
16.1.3	Management and mitigation measures	149
16.1.3.1	Construction phase	149
16.1.3.2	Operations phase	151
17.	Hazard and risk	153
17.1	Hazard identification	153
17.1.1	Construction and maintenance activities	153
17.1.2	Hazardous materials	154
17.1.3	Traffic	155
17.1.4	Natural events	155
17.1.5	Wildlife	157
17.1.6	Disease vectors	157
17.1.7	Actions by members of the public	157
17.2	Risk assessment	157
17.2.1	Basis for assessment	157
17.2.2	Construction risks	159
17.2.3	Operation risk	161
17.2.4	Decommissioning	162
17.3	Risk mitigation	163
17.4	Emergency Management Plan	166
17.5	Summary of risks and risk mitigation	168

18. Health and safety	169
18.1 Description of environmental values	169
18.2 Potential impacts and mitigation measures	170
19. Cumulative impacts	174
19.1 Methodology	174
19.2 Overall impacts	176
19.3 Interrelationship of impacts	178
19.3.1 Land use change	181
19.3.2 Social and economic benefits	181
19.3.3 Water quality	182
19.3.4 Health and Safety	182
19.4 Other regional developments or initiatives	182
19.4.1 Major development projects	182
19.4.2 Policy and planning initiatives	184
19.5 Management and mitigation measures	186
19.5.1 Land and Water Management Plans (LWMP's)	186
19.5.2 Water quality	187
19.5.3 Social issues, health and safety	187
19.6 Conclusion	187
20. Draft environmental management plan	188
20.1 Purpose	188
20.2 Environmental Management Plan outline	189
20.3 Overall EMP	189
20.3.1 Legislative requirements	189
20.3.2 Management structure	192
20.3.3 Training requirements	194
20.3.4 Pre-start work meetings	194
20.3.5 Communication and community liaison	194
20.3.6 Complaints and incidents procedure	194
20.3.7 Auditing	195
20.3.8 Reporting	195
20.3.9 EMP review and update	196
20.3.10 Decommissioning of construction facilities	196
20.4 Environmental management action plans	197
20.4.1 Plan Structure	197
20.4.1.1 Environmental aspect	197
20.4.1.2 Environmental objective	197
20.4.1.3 Performance criteria	197
20.4.1.4 Implementation strategy	197
20.4.1.5 Monitoring	198
20.4.1.6 Auditing	198
20.4.1.7 Reporting	198
20.4.1.8 Non-compliance and corrective actions	198

20.4.2	Action plans	198
20.4.2.1	Land contamination	199
20.4.2.2	Soils, geology and geomorphology	202
20.4.2.3	Terrestrial ecology	205
20.4.2.4	Aquatic ecology	210
20.4.2.5	Water resources	213
20.4.2.6	Water quality	215
20.4.2.7	Noise and vibration	217
20.4.2.8	Air quality	219
20.4.2.9	Waste management	222
20.4.2.10	Visual amenity	225
20.4.2.11	Cultural heritage	226
20.4.2.12	Traffic	227
20.4.2.13	Social and economic	228
20.4.2.14	Hazard and risk	231
20.4.2.15	Health and safety	234
20.5	Plans to be prepared	236
21.	Conclusions	238
22.	References	241
23.	Glossary	252

List of tables

	Page number
Table 9.1	Agricultural water quality guidelines 2
Table 9.2	TSS guidelines for livestock drinking water adopted from ANZEC (2000) 3
Table 9.3	Water quality values and associated agricultural guideline requirements 7
Table 9.4	Mean annual flows and loads 8
Table 9.5	Pollutant loads from the Burdekin River catchment 8
Table 9.6	Mean annual pollutant loads by land use 10
Table 9.7	Comparison of mean annual loads for current condition and future irrigation scenarios (BMT WBM 2009) 19
Table 10.1	Coastal resources, values and pressures in the Burdekin – Bowen Region 27
Table 10.2	Lower Burdekin water body WQOs for nutrients and sediments adapted from Draft Environmental Values and Water Quality Objectives for the Estuarine and Coastal areas of the Lower Burdekin region (2007) 32
Table 10.3	Lower Burdekin water body WQOs for pesticides adapted from Draft Environmental Values and Water Quality Objectives for the Estuarine and Coastal areas of the Lower Burdekin region (2007) 33
Table 10.4	Range of physical water quality parameters recorded 34
Table 10.5	Range of physical water quality parameters recorded 35
Table 10.6	Range of metal concentrations in sampled sediments 37
Table 10.3	Development activities assessable under the <i>Coastal Protection and Management Act 1995</i> 40

Table 11.1	Adopted background 24 hour PM ₁₀ concentration data	53
