

Legend

- Open Speed Limit (Phase 1 reduced levels. Water level 8.5m to 10.5 below spillway)
- Speed limit 6 knots all ships (excluding ships operated by Maritime Safety Queensland, Queensland Police Service and Queensland Boating and Fisheries Patrol).

Downfall

Dam Wall

TINAROO

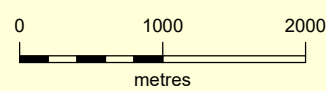

May Bay

Lake Tinaroo

Tinaroo Falls Dam Road

WARNING: The storage capacity level can change rapidly due to inflow from rainfall within the catchment area, or when water is released downstream for irrigation. Consequently, with the lowering of the water level below full capacity, there can be an enormous reduction in surface area and variation in shoreline shape. The result is that previously inundated areas can become exposed and constitute a hazard to navigation.

Water-skiing and the use of PWCs after sunset and before sunrise is prohibited at all times

Not for navigation
