

## TRANSFER CONDITIONS BOWEN BROKEN RIVERS WATER SUPPLY

These local transfer conditions are to be read in conjunction with the conditions as set out on the Temporary Transfer Application Form.

### Loss Adjustments

Under normal conditions there are no loss adjustments for the scheme. SunWater will advise applicants if a loss adjustment will be required.

### Trading Caps

As per the Burdekin Basin ROP a water allocation holder may apply for a seasonal assignment/change to the location of the water allocation.

The proposed seasonal change is not a permitted change if the proposed change would result in a use of medium or high priority water allocations in excess of the cap limitations provided by Department of Environment and Resource Management, as indicated in the below table; current as at December 2009 (subject to change):

Zone	Maximum allowable water use volume (ML)
Bowen Broken A	3600
Bowen Broken B	5676
Bowen Broken C	24325
Bowen Broken D	45
Bowen Broken E	21605

### Transfer Adjustment Fee

A Transfer Adjustment Fee, equal to the value of SunWater's applied irrigation price subsidy, will be payable where water is transferred from a regulated irrigation pricing use to a non-irrigation use. It is the responsibility of the parties to any such transfer to contact SunWater to ascertain this fee in advance of settlement.

A Transfer Adjustment Fee, equal to the value of any other SunWater subsidy or discount to full commercial pricing, will also be payable where water is transferred from any other subsidised use to a non-subsidised use. Again, it is the responsibility of the parties to any such transfer to contact SunWater to ascertain this fee in advance of settlement.

### Other

Additional restrictions on temporary transfers may be applied, for example, in extremely dry conditions or when there is a marked transfer of water to high loss areas, at SunWater's discretion.
