

TRANSFER CONDITIONS CALLIDE VALLEY WATER SUPPLY SCHEME

These local transfer conditions are to be read in conjunction with the conditions as set out on the Temporary Transfer Application Form.

Loss Adjustments

Under normal conditions there are no loss adjustments for the scheme. SunWater will advise applicants if a loss adjustment will be required.

Trading Caps

As per table 26 of the Fitzroy Basin ROP (see below) a water allocation holder may apply for a seasonal change to the location of the water allocation between zones if the proposed seasonal change would not result in a use of medium or high B priority water allocations outside the cap limitations as indicated in the table.

Priority Group	Nominal Volume	Zones						
		Zone 3B	Zone 3A	Zone 5	Zone 7	Zone 8B	Zone 8A	Zone 10B
High B	Maximum volume (ML)	100	500	1200	0			
	Minimum volume (ML)		1200					
Medium	Maximum volume (ML)	3230	3905	2510	1965	1079	1300	1949
	Minimum volume (ML)		1066					
Total	Maximum volume (ML)	14 624						

current as at Sep 2015 (subject to change)

Transfer Adjustment Fee

A Transfer Adjustment Fee, equal to the value of SunWater's applied irrigation price subsidy, will be payable where water is transferred from a regulated irrigation pricing use to a non-irrigation use. It is the responsibility of the parties to any such transfer to contact SunWater to ascertain this fee in advance of settlement.

A Transfer Adjustment Fee, equal to the value of any other SunWater subsidy or discount to full commercial pricing, will also be payable where water is transferred from any other subsidised use to a non-subsidised use. Again, it is the responsibility of the parties to any such transfer to contact SunWater to ascertain this fee in advance of settlement.

Other

Additional restrictions on temporary transfers may be applied, for example, in extremely dry conditions or when there is a marked transfer of water to high loss areas, at SunWater's discretion following discussion with the Irrigator Advisory Committee.
