

Current volumes available for temporary transfer per operational zone

Bundaberg Water Supply Scheme

Data prepared and current as at: 12 October 2021 2:30 PM

Kolan subscheme

Medium priority				
Zone	AA	AB	AC	AD
Min	36,025	2,785	0	46,750
Current	37,899	2,785	2,010	55,616
Max	42,553	6,790	5,160	67,180
Water in	4,654	4,005	3,150	11,564
Water out	1,874	0	2,010	8,866

High priority				
Zone	AA	AB	AC	AD
Min	3,100	0	0	3,990
Current	3,280	53	0	4,043
Max	3,600	105	280	4,190
Water in	320	52	280	147
Water out	180	53	0	53

Burnett subscheme

Medium priority			
Zone	CA	CB	GZ
Min	64,325	4,450	2,855
Current	185,419	30,981	21,134
Max	189,325	156,760	41,235
Water in	3,906	125,779	20,101
Water out	121,094	26,531	18,279

High priority			
Zone	CA	CB	GZ
Min	8,840	0	0
Current	34,323	2,173	500
Max	36,570	37,050	20,000
Water in	2,247	34,877	19,500
Water out	25,483	2,173	500

1. All volumes displayed in the above tables are in megalitres (ML)
2. Explanation of data displayed in the above tables can be found on page 2

More information

For more information about the zone caps for the scheme please refer to the [Bundaberg Water Supply Scheme Resource Operations Licence Operations Manual](#), Chapter 4 Seasonal water assignment rules.

The data prepared in the above tables should be used as a guide only. Customers and water brokers are encouraged to contact Sunwater prior to finalising a temporary transfer to confirm there is water available to complete the trade.

Please see below explanation of the data displayed in the above tables.

Term	Explanation
Zone	A geographic location defined by a reach of a watercourse for defining the location of a water allocation and operational arrangements under the above operations manual.
Min	Minimum trading cap. The potential take volume (water available for temporary transfer) must be greater than or equal to the minimum volume for the zone for the priority group.
Current	Potential take volume (water available for temporary transfer) for a zone group. This is the sum of: <ul style="list-style-type: none">the nominal volumes for all water allocations located within a zone for the priority group at the start of the water yearplus the volume seasonally assigned into the zone for the priority group for the current water yearminus the volume seasonally assigned out of the zone for the priority group for the current water year.
Max	Maximum trading cap. The potential take volume (water available for temporary transfer) must be less than or equal to the maximum volume for the zone for the priority group.
Water in	Current volume of water available to trade (temporary transfer) into a zone
Water out	Current volume of water available to trade (temporary transfer) out of a zone

In addition to meeting the scheme's zone caps, additional restrictions on temporary transfers may be applied at Sunwater's discretion in extremely dry conditions or when the temporary transfer results in the transfer of water to high loss areas. Please refer to pages 2 and 3 of the application form [here](#) and the [Bundaberg local conditions](#) for all terms and conditions that apply to temporary transfers.
