sunwater

Current volumes available for temporary transfer per operational zone

Bundaberg Water Supply Scheme

Data prepared and current as at: 27 October 2021 3:00 PM

Kolan subscheme

| Medium priority | | | | |
|-----------------|--------|-------|-------|--------|
| Zone | AA | AB | AC | AD |
| Min | 36,025 | 2,785 | 0 | 46,750 |
| Current | 36,309 | 2,785 | 2,010 | 55,075 |
| Max | 42,553 | 6,790 | 5,160 | 67,180 |
| Water in | 6,244 | 4,005 | 3,150 | 12,105 |
| Water out | 284 | 0 | 2,010 | 8,325 |

| High priority | | | | |
|---------------|-------|-----|-----|-------|
| Zone | AA | AB | AC | AD |
| Min | 3,100 | 0 | 0 | 3,990 |
| Current | 3,280 | 53 | 0 | 4,043 |
| Max | 3,600 | 105 | 280 | 4,190 |
| Water in | 320 | 52 | 280 | 147 |
| Water out | 180 | 53 | 0 | 53 |

Burnett subscheme

| Medium priority | | | |
|-----------------|---------|---------|--------|
| Zone | CA | СВ | GZ |
| Min | 64,325 | 4,450 | 2,855 |
| Current | 187,476 | 31,056 | 21,246 |
| Max | 189,325 | 156,760 | 41,235 |
| Water in | 1,849 | 125,704 | 19,989 |
| Water out | 123,151 | 26,606 | 18,391 |

| High priority | | | |
|---------------|--------|--------|--------|
| Zone | CA | СВ | GZ |
| Min | 8,840 | 0 | 0 |
| Current | 34,323 | 2,173 | 500 |
| Max | 36,570 | 37,050 | 20,000 |
| Water in | 2,247 | 34,877 | 19,500 |
| Water out | 25,483 | 2,173 | 500 |

1. All volumes displayed in the above tables are in megalitres (ML)

More information

For more information about the zone caps for the scheme please refer to the <u>Bundaberg Water Supply</u> <u>Scheme Resource Operations Licence Operations Manual</u>, Chapter 4 Seasonal water assignment rules.

The data prepared in the above tables should be used as a guide only. Customers and water brokers are encouraged to contact Sunwater prior to finalising a temporary transfer to confirm there is water available to complete the trade.

Please see below explanation of the data displayed in the above tables.

| Term | Explanation |
|-----------|---|
| Zone | A geographic location defined by a reach of a watercourse for defining the location of a water allocation and operational arrangements under the above operations manual. |
| Min | Minimum trading cap. The potential take volume (water available for temporary transfer) must be greater than or equal to the minimum volume for the zone for the priority group. |
| Current | Potential take volume (water available for temporary transfer) for a zone group. This is the sum of: the nominal volumes for all water allocations located within a zone for the priority group at the start of the water year plus the volume seasonally assigned into the zone for the priority group for the current water year minus the volume seasonally assigned out of the zone for the priority group for the current water year. |
| Max | Maximum trading cap. The potential take volume (water available for temporary transfer) must be less than or equal to the maximum volume for the zone for the priority group. |
| Water in | Current volume of water available to trade (temporary transfer) into a zone |
| Water out | Current volume of water available to trade (temporary transfer) out of a zone |

In addition to meeting the scheme's zone caps, additional restrictions on temporary transfers may be applied at Sunwater's discretion in extremely dry conditions or when the temporary transfer results in the transfer of water to high loss areas. Please refer to pages 2 and 3 of the application form <u>here</u> and the <u>Bundaberg local</u> <u>conditions</u> for all terms and conditions that apply to temporary transfers.
