This Service and Performance Plan has been prepared by Sunwater to provide indicative information to our customers for the purpose of consultation. It contains estimates and forecasts which are based upon a number of assumptions. The actual financial performance of the service contract to which this plan relates, and the operations and activities actually undertaken by Sunwater during the relevant periods, may vary materially from the information contained in this plan. This plan should not be relied upon beyond its purpose as a tool for consultation and you should not rely on the information contained in this plan in making decisions about your circumstances. Sunwater will not be responsible or liable for any loss (including consequential loss), claim or damage (including in tort) that is in any way connected with the use of this plan or the information contained within it.

At a glance

Our customers

The majority of the 28 customers in this scheme are irrigators who grow cereals and cotton, as well as pasture and fodder crops. Water is also supplied to the town of Chinchilla.

Our irrigation charges

Table 1 Scheme irrigation charges for 2023-24

<div> <div>\$</div> Charges by tariff group 2023-24 </div>							
Chinchilla Weir		Irrigation charge ¹		Cost-reflective charge ²		Δ to cost reflective	
River – medium priority	Part A	\$17.72	\$/ML	\$20.85	\$/ML	-\$3.13	\$/ML
	Part B	\$3.14	\$/ML	\$3.95	\$/ML	-\$0.81	\$/ML

- Includes the Queensland Government's 15 per cent discount for irrigation customers. Refer to www.rdmw.qld.gov.au for more information.
- Is the cost-reflective price determined by the Queensland Competition Authority (QCA) in its 2020–2024 irrigation price investigation. Costs reflect lower bound cost recovery, i.e. recovery of future replacement and ongoing maintenance and operations.

For more information on Sunwater's fees and charges, refer to:

www.sunwater.com.au/customer/fees-and-charges/

Introduction

This Service and Performance Plan (S&PP) details a range of proposed scheme activities and projects and presents a breakdown of anticipated costs for review. It also sets out Sunwater's actual costs for 2022-23.

The purpose of this year's S&PP for Chinchilla Weir is to:

- examine Sunwater's performance in 2022-23 against cost and service targets
- present to customers Sunwater's projected costs¹ for 2023-24 and 2024-25
- consult with our customers on forecast operating and annuity-funded costs for 2023-24 and the forward program of works.

In addition to this S&PP, Sunwater submitted its irrigation pricing proposal to the Queensland Competition Authority (QCA) on 30 November 2023 which explains the types of costs we incur in delivering water to our customers and how those costs are allocated to service contracts. The pricing proposal and associated customer material is available at: www.sunwater.com.au/projects/price-path/.

Input from customers is a valuable part of Sunwater's planning process and ensures that we invest in areas which support the services we provide to customers.

Sunwater engages with its customers both formally and informally throughout the year and customer feedback is a valuable part of our planning process.

The publication of an annual S&PP is an important part of the formal feedback process, providing a snapshot of Sunwater's performance over the most recently completed financial year, as well as an outline of the areas of focus for the current year.

We welcome and encourage your feedback on this S&PP. To have your say, please contact us via email or post:

Email: sppfeedback@sunwater.com.au

Post: S&PP Feedback

PO Box 15536

City East Qld 4002

¹ All financial figures reported in this document are in nominal dollars, i.e. dollars of the day. Figures may not sum due to rounding.

Delivering services to our customers

Entitlements

The water allocations for each customer segment are shown below.

Figure 1 Water access entitlements (as of 30 June 2023)

Historical water usage

The chart below shows annual water usage for the past 10 years.

Figure 2 Scheme historical water usage for the past 10-years

- Usage in 2022-23 was broadly in line with the level of the 10-year average usage of 2,400 ML.
- Part B prices for the current period were set using a 20-year average of 2,260 ML.

Service targets

Sunwater and customers have agreed Water Supply Arrangements and Service Targets for Chinchilla Weir.

Table 2 sets out our recent performance against selected service targets for this scheme.

Table 2: Scheme service targets and performance

Service target		Target	Number of exceptions		
			2020-21	2021-22	2022-23
Planned shutdowns – notification	For shutdowns planned to exceed 2 weeks	8 weeks	0	0	0
	For shutdowns planned to exceed 3 days	2 weeks	0	0	0
	For shutdowns planned to be less than 3 days	5 days	0	0	0
Unplanned shutdowns – duration ¹	Unplanned shutdowns during Peak Demand Period	48 hours	0	0	0
	Unplanned shutdowns outside Peak Demand Period	5 working days			
Maximum number of interruptions	Planned or unplanned interruptions per water year	6	0	0	0

1. This is the number of times that the unplanned shutdown has exceeded the shortest of the peak/off peak periods.

In addition, Sunwater has company-wide customer interactions service targets. Our performance in 2022-23 against these service targets is shown in Table 3.

Table 3: Customer interactions service targets and performance

Service target	Target	2022-23
Telephone answering ¹	80.00%	92.50%
Requests actioned within Service Level Agreement (SLA) timeframes ²	> 95.00%	99.47%

1. This target measures the percentage of 13 15 89 calls that are answered within 60 seconds.
2. This target measures the percentage of email or workflow requests (such as property transfers and temporary transfers) to the Customer Support team that are completed within the agreed SLAs. The SLA timeframes range between two and 10 business days, depending on the request.

Key infrastructure

Chinchilla Weir is the key infrastructure used to deliver bulk water services to our customers in Chinchilla. It is a concrete faced, earth fill weir and has a total storage capacity of 9780 ML.

Cost of delivering services—Operating expenditure

Operating expenditure includes funds for: operations activities, (i.e. operations, electricity, and insurance); preventative maintenance; and corrective maintenance.

Table 4 sets out actual and forecast operating expenditure for Chinchilla Weir.

Our performance in 2022-23

In 2022-23, total operating costs were 11.5 per cent higher than the QCA's recommended cost target. Further information is provided in the pricing submission proposal and associated scheme summaries.

Outlook for 2023-24

Chinchilla Weir Bulk Water Service Contract's total operations budget in 2023-24 is above the QCA's recommended cost target. Insurance is one of Sunwater's largest expenditure items. These costs have increased significantly in recent years due to multiple flood events in Queensland and global insurable events impacting premiums. The escalation of insurance premiums has directly contributed to the rise in Sunwater's operating expenditure.

Sunwater's primary operation and maintenance objectives in 2023-24 centre around maintaining service levels while optimizing cost efficiency. To achieve this, an emphasis has been placed on technology upgrades to reduced travel costs.

Table 4: Operating expenditure¹

Operations and maintenance costs - by sub-category							
	2022-23 actuals \$'000				2023-24 forecast \$'000		
	QCA	Sunwater ³	Δ to QCA		QCA	Sunwater ³	Δ to QCA
Insurance	\$17.7	\$18.1	2.4%	◀▶	\$18.1	\$21.9	20.6% ▲
Electricity	\$0.0	\$0.0	-	-	\$0.0	\$0.0	- -
Operations & maintenance	\$45.0	\$59.1	31.4%	▲	\$46.1	\$58.3	26.5% ▲
Support costs	\$56.9	\$56.1	-1.4%	◀▶	\$58.3	\$58.1	-0.3% ◀▶
Total opex²	\$119.6	\$133.4	11.5%	▲	\$122.5	\$138.3	12.9% ▲

▲	△	◀▶	▽	▼
10% above the QCA target	5% above the QCA target	In line with the QCA target <5%	5% below the QCA target	10% below the QCA target

1. Reflects the QCA's 2020–2024 irrigation price investigation final recommendations. Excludes recreational facility costs.
2. From 1 July 2020, irrigation customers no longer contribute towards the cost of operating and maintaining recreational facilities. These costs have been excluded from the total operating expenditure.
3. Sunwater's 2022-23 actual expenditure figures presented in this table are pre-adjustment and will differ from our Irrigation Pricing Proposal and its engagement materials. Sunwater's 2023-24 figures align with our pricing submission, these figures may differ from the budget.

Cost of delivering services—Renewals annuity and non-annuity funded expenditure

Renewals discussion

Sunwater recovers expenditure required to renew (maintain the current level of service an asset provides) its assets via a renewals annuity. The annuity treats all renewals related expenditure as an expense (i.e., not capital) and amortises a multi-year expenditure forecast (30-years) such that the amount customers pay is smoothed, relative to the actual expenditure profile. Negative opening balances reflect expenditure incurred by Sunwater which has not yet been recovered via the annuity contribution amount, while positive opening balances reflect expenditure which has been pre-recovered via the annuity contribution amount. Forecast annuity balances, and the impacts of budgeted spend, are shown in Table 5 below.

The QCA and Sunwater closing balances differ due to differences in the expenditure profile allowed by the QCA in its 2020-24 final recommendations and actual expenditure incurred by Sunwater in 2022-23 and what we expect to spend in 2023-24.

Annuity-funded expenditure includes funds for planned corrective maintenance (PCM), as well as large, one-off operations activities. Activities include monitoring of the asset condition to inform when an asset needs to be refurbished or replaced under the PCM program.

Non-annuity funded expenditure largely relates to Sunwater's Dam Improvement Program and recreational facility costs.

Our performance in 2022-23

Performance against the QCA target

Sunwater updates our program of works based on our whole-of-life replacement and maintenance strategy, which looks at the risk and condition of each asset and uses this information to estimate the future work required to ensure the asset will continue to provide the required level of service into the future. Other factors such as changes in project delivery timing (e.g. due to weather) may also affect the program of works.

These factors mean the actual program of works delivered in any given year will differ to the program assessed by the QCA. At a project level, cost variances may also occur due to changes in the scope of work and cost inputs.

Further explanation of our performance is provided in the pricing submission and scheme summaries.

Project level cost variances

Table 6 provides a comparison of the annuity-funded projects planned for 2022-23 and the actual projects undertaken, together with justification for the variances.

Outlook

Details of the major annuity-funded projects planned for the 2023-24 and 2024-25 period are set out in Table 7.

Table 5: Annuity and non-annuity funded expenditure and roll forward¹

▲	△	◀▶	▽	▼
10% above the QCA target	5% above the QCA target	In line with the QCA target <5%	5% below the QCA target	10% below the QCA target

1. Forecast annuity-funded costs from 2020-21 exclude recreational facility projects.
2. Reflects the QCA's 2020–2024 irrigation price investigation final recommendations.
3. The annuity contribution is included in the prices paid by bulk water and distribution customers. From 2020-21 to 2023-24, the annuity contribution is based on the QCA's irrigation price investigation 2020–2024 final recommendations.
4. Meter replacement requirements will be reviewed based on work completed in previous years and completion against legislative timeframes.
5. Sunwater's 2022-23 actual expenditure figures presented in this table are pre-adjustment and will differ from our Irrigation Pricing Proposal and its engagement materials. Sunwater's 2023-24 figures align with our pricing submission, these figures may differ from the budget.

Comparison of forecast and actual annuity-funded projects for 2022-23

The below table sets out the major annuity-funded projects planned for Chinchilla Weir in 2022-23² and the actual projects undertaken.

Table 6 Comparison of forecast and actual annuity-funded projects for 2022-23

Facility	Activity description	Forecast \$'000	Actual \$'000	Commentary
Scheme	Replace – customer meters to meet the Murray-Darling Basin measurement policy.	385	41	Failing meters were replaced. The meter validation process was deferred to 2023-24 as direction from the Department of Natural Resources Mines and Energy (DNRME) was required.
Chinchilla Weir	Study – bathymetric survey to determine storage volume.	72	45	This project was completed under budget due to a competitive tendering process and packaging the works with another project.
Chinchilla Weir	Study – investigate valve hydraulic counter fault.	18	9	The scope of work changed requiring less labour to complete the options analysis than originally anticipated.
Scheme	Replace – safety signage for public safety improvements.	18	4	The project was completed in conjunction with other works, resulting in the project being completed under budget.
Multiple	Non-scheduled projects	-	1230	Most of this expenditure related to emergency works required to protect the integrity of the weir. Repairs were completed to the scoured sections of the left and right bank (\$1170k). The cost variance was driven by unplanned carryover projects including arc flash 1 to understand and assess the arc flash assets in the Service Contract from a risk category rating perspective. This is a multi-year project required to comply with updated arc flash standards and will lead into secondary program(\$28k); and comprehensive inspection of Chinchilla Weir (\$20k). In addition, a fence was installed on the right bank to prohibit vehicle and cattle access (\$12k).
2022-23 Total		494	1329	

² Based on information extracted from Sunwater's systems in mid-2023. See the 2023 S&PP at www.sunwater.com.au/schemes/Chinchilla-Weir/

Annuity-funded projects for 2023-24 and 2024-25

The below table sets out Sunwater’s currently planned annuity-funded projects for 2023-24 and 2024-25³ period for this scheme. While the immediate program is well defined, estimates become more uncertain further into the planning timeline. Forecasts are likely to change in future S&PPs, reflecting changes in project delivery timing; asset condition and risk updates; outcomes from scheduled asset inspections; and customer feedback. The data in Table 7 is presented at a granular level and may not align with the overarching program names in our pricing submission.

Table 7 Forecast annuity-funded projects planned for 2023-24 and 2024-25

Year	Facility	Activity description	Forecast \$'000
2023-24	Scheme	Replace – customer meters to meet the Murray-Darling Basin measurement policy.	174
	Chinchilla Weir	Refurbish – hydraulic counters based on study undertaken in 2022-23.	64
	Scheme	Refurbish – customer meter validation and upgrade based on condition and age.	14
	2023-24 Total		252
2024-25	Scheme	Study – arc flash risk assessment program to identify arc flash hazards and meet comply with new standards.	84
	Scheme	Replace – customer meters to meet the Murray-Darling Basin measurement policy.	14
	2024-25 Total		98

³ The project forecasts provided in this table align with our pricing submission. It is important to acknowledge that these projects are inherently dynamic and susceptible to changes influenced by various factors.
