

Chinchilla Weir Water Supply Scheme

Water Supply Arrangements and Service Targets

Water supply arrangements

Water Supply Arrangements are referred to as Sunwater Distribution Rules in the River/Groundwater contract.

To manage the water delivery to customers, arrangements for the taking of water in the Chinchilla Weir Scheme have been discussed with the Irrigator Advisory Committee and are outlined below. These arrangements are aimed at achieving the efficient delivery of water to customers in the scheme that best meets their needs.

River supplies

Taking water from the scheme

In the Chinchilla Weir Water Supply Scheme (river), customers must place water orders using the IVR or SunWaterOnline ordering system. Orders must be placed before taking water (see travel time section) so as to allow Sunwater to release sufficient water from Chinchilla Weir, and to minimise losses. Advanced water orders prior to taking water are required as follows:

- at least eight days before taking water for those customers downstream of the weir
- 24 hours for all customers on the weir pool

To place an order customer can utilise the following ordering systems:

- contact the Pittsworth office (07) 4639 6600
- contact Darrell McKinlay 0427 683 322 or email Darrell.Mckinlay@sunwater.com.au
- contact Warren Hess 0417 551 872 or email Warren.Hess@sunwater.com.au

The amount of water taken must not exceed the ordered volume. The water ordering system assists Sunwater to deliver water to customers in an efficient and timely manner and enables customers to plan and manage their water use. Customers who take water without ordering will reduce Sunwater's ability to supply customers who have ordered according to the above requirements.

Orders may not be available during:

- interruptions to supply (both scheduled and unscheduled)
- periods of low demand for water, when water losses or operational circumstances make it impractical to supply e.g. during times when there is no irrigation demand.

Customers requiring water during these times should contact the operations officer to obtain information regarding water delivery.

Timing

Orders are processed on a daily basis at 7:00am. Orders received after this time cannot be processed until the following day.

Cancellations

Cancellations may be carried out either online or through the Phone Water Ordering System if water order is outside of the notice period. Water Orders within the notice period can only be cancelled by notification to the operations officer.

Rain/weather shutdown

Customers must notify the Operations Officer as soon as possible of any major rain event that substantially lessens their water requirements.

To conserve water, the operations officer may shutdown the system when there is widespread general rain. Customers are also asked to cancel orders if they no longer require ordered water.

Access to storage

Storages are currently operated in the following range: Chinchilla Weir - 8 metres below Full Supply Level (Dead Storage) This range may change in the future if required, for example under Sunwater's Resource Operations Licence (ROL) and for other licence changes. Customers should note that they are responsible for locating and maintaining pumps to take water.

Waterharvesting

Waterharvesting is announced and charged for by the Department of Regional Development, Manufacturing and Water (DRDMW). Some customer's waterharvest through a pump metered by Sunwater. To account for the water taken as waterharvesting, customers must advise the DRDMW of their start and stop meter readings within 48 hours. The DRDMW then informs Sunwater of these readings so that Sunwater can record this use as waterharvesting.

If no meter reads are received by the DRDMW then all water taken will be treated as announced allocation.

Changes to the volume or location for taking water

Sunwater approval must be sought prior to river customers:

- obtaining multiple delivery points
- transferring water to another customer
- transferring water outside of the river system to a channel customer.

For their benefit, customers should obtain Sunwater's approval through an application form process before finalising any dealings with another party, e.g. a temporary transfer. Sunwater may require operational and other issues to be resolved before approving. These will be discussed with customers during the application and approval process. Application forms can be obtained by calling Customer Support on 13 15 89 and from sunwater.com.au.

Changes to customers' pumping arrangements

Customers must obtain approval from Sunwater before proceeding with any changes to their pumps, including changing size/capacity of the pump.

Delivering water for prosperity

Stopping or restricting supply

Sunwater may suspend or restrict supply in a number of circumstances, including:

- during maintenance of Sunwater's assets
- if supply could cause Sunwater to break the law
- during a peak demand period, when rosters or rations may apply
- when the demand for water is so small it is impractical to supply it
- infrastructure limitations which make delivery impractical
- when there is a need to make special releases to maximise efficiency at times of limited supply, or during rain shutdown or customer pump breakdown situations
- when operating under special notices or regulations issued by DRDMW.

In the event that Sunwater restricts or suspends supplies customers should make arrangements for on-farm water storage to provide their ongoing water requirements during interruptions.

Stream Flow

Stream Flow enables customers to take streamflow's that are below waterharvesting thresholds but would otherwise not contribute to storage in the scheme. Sunwater is able to provide this product to its customers in lieu of announced allocation under certain circumstances.

Sunwater will notify water allocation holders for their zone of the start and end of a stream flow period via phone or fax. Customers wishing to take advantage of a stream flow period must telephone, email or fax to Sunwater Customer Support their start meter readings so the water taken can be recorded as stream flow.

At the end of the Stream Flow event, Sunwater will announce via phone or fax that Stream Flow has ended. Customers must telephone, email or fax their end meter readings within two business days of this announcement.

Water charges

Water taken as stream flow attracts the normal consumption charge. There are no other charges associated with stream flow.

Customers are responsible for monitoring their water use under both stream flow and allocation water against their water allocation amount. Customers can obtain specific information on the use of stream flow by contacting Customer Support on 13 15 89.

General

Complaints and dispute resolution

Sunwater's aim is to resolve problems and complaints quickly and effectively. Where a customer has a concern that is not able to be resolved, customers can choose to initiate a formal dispute resolution process by writing to the customer accounts manager.

If, through discussions, resolution cannot be reached either party may request the commencement of negotiations in good faith on a dispute resolution procedure, other than litigation or arbitration. If an agreement is reached to proceed to the next phase, independent mediation services of the Disputes Resolution Centres of Queensland can be used.

Billing arrangements

Invoices are sent quarterly, and all invoices must be paid within 30 days. Payments are allocated to the customer's oldest debt first, unless an invoice is in dispute. Sunwater only posts summary invoices, however, you can receive a detailed invoice via email. Contact Customer Support on 13 15 89 to receive invoices via email.

Notices

Correspondence should be sent to Sunwater Customer Support as detailed below.

Sunwater Limited
PO Box 15536
CITY EAST QLD 4002

Facsimile: (07) 3120 0249

Email: customersupport@sunwater.com.au

Communication – contact arrangements

Sunwater Customer Support is available for enquiries and business transactions (billing, temporary transfers, etc.) between the hours of 8.30am and 4.30pm Monday to Friday on 13 15 89. Sunwater Online is also available to all account holders and gives customers the ability to enter meter reads, view and print Invoices, update account details, enter water orders, submit temporary transfer and carryover applications. Call 13 15 89 to set up access or visit the managing your account page at www.sunwater.com.au for help with Sunwater Online.

When calling Customer Support, please have your customer number and water allocation/offtake number when reporting supply problems.

In the event of an emergency, please call 13 15 89 and press 1 (24 hours a day, 7 days a week). Further information about Sunwater can be obtained from our website: www.sunwater.com.au

Phone: 13 15 89

Email: customersupport@sunwater.com.au

Service targets

As described under clause 3 of the standard contract:

- 3(d) Sunwater shall, at approximately annual intervals, during this Agreement publish a report comparing the performance of Sunwater with the Service Targets;
- 3(e) Sunwater shall publish Service Targets for the Regulated Area and revise these from time to time after considering changes in customer needs determined through customer consultation, and changes in industry practice and procedures.

We are committed to publishing service targets and reporting to customers on our performance against targets. Following discussion and consultation with the Irrigator Advisory Committee, this document contains service targets that have been set for the Chinchilla Weir Supply Scheme (river).

Planned shutdowns

Planned shutdowns have been included as a target and Sunwater recognises that the following are important service issues for you:

- that you will be notified about a shutdown so that you can plan ahead
- the timing of the shutdown should suit most customers
- the duration of the shutdown should minimise the impact on customers while enabling Sunwater to perform maintenance on the scheme.

Definition: a planned shutdown occurs when customer supply is interrupted or restricted due to the performance of work that is planned in advance.

Planned shutdowns – timing

Delivery service type	Scheme target
River	The timing of all planned shutdowns will be set following consultation with the Irrigator Advisory Committee (for a shutdown affecting a large part of the scheme) or customer groups or individuals (for shutdowns effecting small areas).

Planned shutdowns – duration

Delivery service type	Scheme target
River	Sunwater will complete all planned shutdowns within the period notified to customers (unless varied by agreement with the group originally consulted with), unless something occurs that is beyond Sunwater's control, such as adverse weather conditions

Planned shutdowns – notice

Delivery service type	Scheme target
River	<p>For shutdowns planned to exceed two weeks, at least eight weeks written notice by letter will be provided to each customer affected by the shutdown.</p> <p>For shutdowns planned to exceed three days, at least two weeks notice by letter, SMS messaging, email or verbal advice will be provided to each customer affected by the shutdown.</p> <p>For shutdowns planned to exceed three days, at least five days notice by letter, SMS messaging, email or verbal advice will be provided to each customer affected by the shutdown.</p>

	Each notice will state the start date, and anticipated shutdown duration. A reminder SMS messaging and email will be sent before the planned shutdowns commence.
--	--

Unplanned shutdown

Unplanned shutdowns have been included as a target and Sunwater recognises that the information provided to you about an interruption and the period of time taken to resume supply are important to you.

Definition: An Unplanned Shutdown is an unforeseen or not planned mechanical or operational failure of Sunwater’s water delivery infrastructure that stops or restricts the supply of water to a customer for more than 2 hours (including emergency repairs). It does not include events that are beyond Sunwater’s control (e.g. power failure or storm)¹ and does not include interruptions to supply caused by errors in estimating water demand and releases, or people taking water without authorisation.

Unplanned shutdown – duration

Delivery service type	Scheme target
River	<p>Unplanned Shutdowns will be fixed so that at least partial supply can be resumed to those customers requiring water within:</p> <ul style="list-style-type: none"> • 48 hours of Sunwater being notified of the event, during a peak demand period; or • 5 working days of Sunwater being notified of the event, outside peak demand period. • Peak demand periods are to be set in consultation with Irrigator Advisory Committee. <p>Some events may interrupt supply greater than the above standard and are excluded from these targets. Sunwater will notify all affected customers by SMS messaging and/or email, or telephone.</p>

Unplanned shutdown – notice

Delivery service type	Scheme target
River	<p>Unplanned shutdowns will be fixed so that at least partial supply can be resumed to those customers requiring water within:</p> <p>48 hours of Sunwater being notified of the event.</p> <p>Some events may interrupt supply greater than the above standard and are excluded from these targets. Sunwater will notify affected customers by SMS Messaging, email or verbal advice.</p>

Unplanned shutdown – notice

Delivery service type	Scheme target
River	<p>Sunwater will notify all affected customers requiring water by SMS, email, verbally or by phone of the likely duration of the interruption to supply within 24 hours of learning of the event, or by the end of the first business day following the event, whichever is the earlier.</p>

¹ This includes other events described as Events of Force Majeure in your contract

Unplanned shutdown – meter repairs

Delivery service type	Scheme target
River	Faults causing restrictions to supply will be repaired within two working days of Sunwater being notified.

Total frequency of interruptions to supply

Delivery service type	Scheme target
River	No customer will experience more than six planned or unplanned interruptions per water year (as defined above).

Complaints and enquiries

Sunwater will provide an initial response to customer complaints within five business days of receiving the complaint through the following channels:

- in writing; or
- by telephoning Customer Support on 13 15 89.
- Sunwater will either resolve a customer's complaint or provide a written response providing reasons why the complaint has not or cannot be resolved within 21 days of receiving the complaint.

Customer obligations

The customer principal obligations are set out in clause four of the standard contract.

Warning to customers

In particular, customers must not take more than the customer maximum delivery volume as allowed by the customer standard contract without first obtaining Sunwater approval. If a customer exceeds the maximum delivery volume, the customer may also be in breach of the Water Act 2000. Sunwater may direct the customer not to take any water. Depending on the circumstances of the breach, the customer is not automatically entitled to forward draw on the following year's water entitlements, if any, and is therefore not entitled to take water until Sunwater is satisfied that the breach has been remedied.
