

PREDICTION OF 2019-2020 START OF WATER YEAR ANNOUNCED ALLOCATION FOR 1 JULY 2019

To assist in giving you an indication of what water may be available to you at the start of the new water year on 1 July 2019, Sunwater has predicted the start of water year Announced Allocation for the 2019-2020 Water Year using the forecast storage level tool that is available on our website.

CLAUDE WHARTON, JONES, KIRAR and WURUMA SUBSCHEMES

The **predicted** Announced Allocation for 1 July 2019:

- High Priority is **predicted** to be 100%
- Medium Priority is **predicted** to be 100% (plus any carryover that individuals may have approved)

JOHN GOLEBY WEIR SUBSCHEME

The **predicted** Announced Allocation for 1 July 2019:

- Medium Priority is **predicted** to be in the range of 90% to 98% (No Carryover)

To calculate these predictions Sunwater has made an assumption on the volume of water in storage on 1 July, however many variables affect this assumption which may include inflow, releases and evaporation that may occur between now and 30 June 2019. As such, **these are PREDICTIONS ONLY and are intended to provide you an indication of what the Announced Allocation may be for the new water year.**

From 1 July 2019 Sunwater will calculate the actual start of water year Announced Allocations for 2019-2020 and will publish the announcements accordingly. Customer notifications will be provided by email and/or SMS and will be made available on the Sunwater website. Please call us on 13 15 89 if you need to update your contact details.
